

Average Weights Heatmap for Layer 106

The heatmap displays the average weights for a 17x17 matrix. The x-axis is labeled 'Index' and the y-axis is labeled 'Parameter Set'. A color bar on the right indicates the 'Value' range from -1.5 (dark purple) to 0.5 (yellow). The diagonal elements are predominantly yellow, indicating positive values, while the off-diagonal elements are mostly green, indicating values near zero. There are some dark purple blocks on the left side, indicating negative values.
